Hi Iaroslav,

I'm having issues with syndication in iaruat – see following

1. Create new DOI organisation with new DOI record, and publish

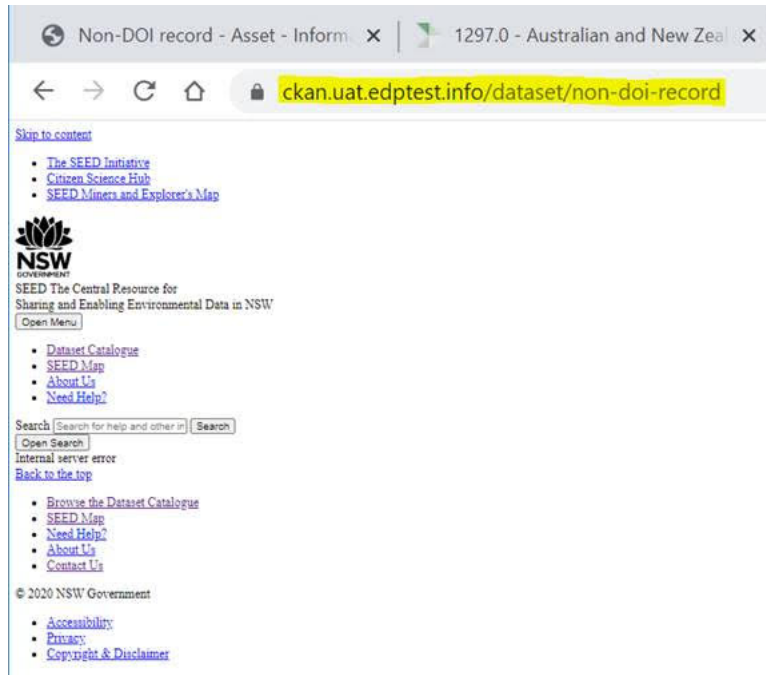

- Created new org with DOI minting enabled <https://iaruat.environment.nsw.gov.au/organization/doi-2-org>
- Created new record in the new org, with 'mint DOI' set to "yes" https://iaruat.environment.nsw.gov.au/dataset/asset_management/parent-vector-with-doi
- For one of the attached resources, <https://iaruat.environment.nsw.gov.au/dataset/parent-vector-with-doi/resource/cd1dea41-63bc-4978-a596-6783c549d906/edit> tried to set 'Mint Handle' to "yes", but field locked to "No"

- Set 'Approved for Open Data' to "yes", but record has not syndicated to test SEED
- Tried to [SYNC ASSET], but the when I click [ACCEPT] the screen is frozen

2. Create a new record in an existing syndicated org and publish

- Select an existing syndicated organisation <https://iaruat.environment.nsw.gov.au/organization/edit/australian-government-department-of-the-environment-and-water-resources>
- Create a new record in the existing org, with 'mint DOI' set to "No" <https://iaruat.environment.nsw.gov.au/dataset/non-doi-record>
- Note as before, 'Mint Handle' field locked to "No"
- Set 'Approved for Open Data' to "yes",
 - record has syndicated to test SEED <https://ckan.uat.edptest.info/dataset/non-doi-record>
 - however clicking on the record name returns a 500 error (instead of the record)

- Record has not syndicated to test data.NSW
 - Tried to [SYNC ASSET], but the when I click [ACCEPT] the screen is frozen

3. Repeated scenario 2, except created a new record in a non-DOI-enabled org

- <https://iaruat.environment.nsw.gov.au/organization/conargo-shire>
- https://iaruat.environment.nsw.gov.au/dataset/asset_management/record-in-non-doi-org
- <https://ckan.uat.edptest.info/dataset/record-in-non-doi-org>
 - Record on test SEED returns a 500 error
- Record hasn't syndicated to test data.NSW
- Again, get a frozen screen when attempt to [SYNC ASSET]

Over to you

Thanks

Jane
